

Karndean Cleaning and maintenance

Regular cleaning

Regular cleaning with a pH neutral cleaner such as Karndean Clean will help keep your floor at its best. Follow these simple steps for cleaning your Karndean floor:

1. With a soft sweeping brush, remove any loose dirt or dust
2. Add 50ml of **Karndean Clean** (1 notch represents 50ml) to approximately 8-10 litres of clean water
3. Mop the **Karndean Clean** solution onto the whole floor, removing any excess liquid

Then allow your floor to dry before walking on it.

Karndean's Floor Care Kit

Karndean's Floor Care Kit contains all you need to clean and maintain your floor. It includes:

- ! Karndean Clean
- ! Karndean Remove
- ! Karndean Refresh
- ! Floor Protector Pack
- ! Refresh Pad and Remove Pad
- ! Applicator
- ! Floor Care Guide

For an occasional refresh

Every six to twelve months you may want to treat your floor to some extra care to further enhance its look and durability.

- ! **Karndean Remove** helps to prepare your floor before applying Karndean Refresh.
- ! **Karndean Refresh** creates a satin finish to your floor and helps protect it from marks and fine scratches

Helpful hints and tips

- ! Mop up spills as soon as possible, using Karndean clean, to reduce the risk of staining
- ! For stubborn stains, spot clean with undiluted Karndean clean or remove
- ! Use entrance mats to protect against grit and moisture (ensure they are non-rubber backed to prevent any discolouration of the floor)
- ! Avoid sliding or dragging furniture or other objects across the floor – use the floor protector pads included in Floor Care Kit, to prevent scratching.
- ! Use load bearing castors to protect against indentation from heavy furniture

FLOORING WORKS

- ! Regularly sweep the floor to remove loose dirt or grit as these can cause fine scratches (we don't recommend you use a steam mop or a vacuum cleaner as they can damage the surface of the floor)
- ! Avoid the use of regular household cleaners and bleach based detergents. These could make the floor slippery or cause discolouration
- ! If the floor has a streaky appearance, it may be that:

Karndean remove has not been removed completely – repeat the process ensuring the floor is rinsed thoroughly

- ! When applying Karndean refresh to your floor, be careful not to apply it too thickly. Two thin coats will be sufficient
