

Moduleo cleaning and maintenance

Your new floor has been carefully designed to stay looking at its best for years, but you can help keep it at peak performance with a simple maintenance routine and your new Xtrafloor starter kit

Each product in your kit has been developed for use with your luxury vinyl floors and will keep it clean and looking beautiful.

Xtrafloor advice

- ! Cleaning is easy, with just an ordinary broom, microfiber cloth or damp mop with your Xtrafloor cleaner maintainer.
- ! Don't use aggressive cleaning agents or steam cleaner on your floor.
- ! Clean up any spillages immediately and any residues should be removed using Xtrafloor spot cleaner and a suitable cloth.
- ! Sharp objects can scratch the floor, so precautions should be taken.
- ! The effective use of a doormat reduces the instances of sharp objects such as dust, sand and stones on the soles of your shoes.
- ! Furniture legs (chairs, tables, cabinets, etc.) should have suitable protection at their base – such as Xtrafloor furniture felt pads, while office chairs should have soft wheels.
- ! The PU finish of the wear layer eliminates the need for any special treatment after installation, but over time, an extra treatment with polymeric dispersion or a PU gloss polish may help if visible contaminations begin to develop.

Xtrafloor starter kit
